

## Clearly Different

5.5x10<sup>10</sup> cfu/g *Bacillus subtilis*

Clarity is a natural biological fungicide based on *Bacillus subtilis* mbi600.

### Formulation and Handling

- Clarity is a highly concentrated product without excess fillers. No chalky residue!
- Low application rates
- Packaged in a 1ha (265g) application sachet
- Mixes easily and rapidly in the spray tank without premixing or lumps.
- As with all biological products store in a dark place out of direct sunlight
- Does not require refrigeration

**Use Rate:** 265g or 1 sachet per hectare regardless of water rate. A minimum of 265g/ha is required to achieve product efficacy.

Do not apply in heat or bright sunlight. Apply early morning. Always consult your rep in regards to what

products can be tank mixed. Do not combine with other biologicals, fungicides and phosphoric acid based foliar fertilisers.

Use Clarity on it's own or in conjunction with chemical fungicides to manage disease.

During times of low disease pressure use Clarity on a regular basis to improve turf health.

If disease occurs add a fungicide into the tank mix.
