

SIMPLOT FERRO-CIOUS WINTER

Turf-grass Toughening and Greening

Simplot Ferro-cious Winter is a next generation formulation designed to assist in turf-grass toughening and greening.

Simplot Ferro-cious Winter contains potassium, iron and magnesium all in the citrate form. This combination of nutrients will assist in both hardening of turf grass and the development of natural green-up.

Iron applied to turf will create the production of excess chlorophyll thus giving a longer-lasting deep green appearance. The magnesium and nitrogen will aid in the formation of chlorophyll along with the Iron.

Simplot Ferro-cious Winter has a balanced NPK of 5-0-20 which is essential for winter hardening of turf. 5% nitrogen in an upfront form allows enough nitrogen for growth and greening in winter.

DIRECTIONS FOR USE: TURF

Rate: 200 - 500 mL / 100 m²

APPLICATION NOTES:

Rate: 4 - 10 L water / 100 m²

Apply as required to improve colour and strength.

PRODUCT ANALYSIS

			w/v%
Nitrogen	(N)	as Urea	5.0
Potassium	(K)	as Citrate	15.0
Iron	(Fe)	as Citrate	4.0
Magnesium	(Mg)	as Citrate	2.0

PRODUCT SPECIFICATIONS

S.G:	1.38
pH (Neat):	4.0 - 5.0
Appearance:	Brown liquid
Shelf Life:	3 years

AVAILABLE PACK SIZES & WEIGHTS

5 Litre:	7.5
20 Litre:	30.0
200 Litre:	300.0
1000 Litre:	1530.0
